Associate Vice President, Tribal Relations
Office of Government & Community Engagement
Purpose and Intent

- ASU’s Demonstrated Commitment to Tribal Nations
- ASU PPE Response Network
- Tribal-Specific Projects
- Indigenous Lifeways: Response, Recovery, Renewal
JOIN US
The PPE Response Network
The PPE Response Network is a unified, community-driven response effort to produce and deliver medical supplies for combating COVID-19.

Tribal Nations in Arizona
The ASU Office of American Indian Initiatives encourages tribal governments and tribal health care providers to register with the PPE Response Network so they can begin to receive supplies as they become available.

Who
Tribal governments and tribal health care organizations can register as Health Care Providers. The Network aims to support organizations in need of PPE whose staff work in direct contact with COVID-19 patients.

How
1. Visit: pperesponsenetwork.asu.edu
2. Click "Join" at the top of the page.
3. Select "Health Care Providers" to register as a verified provider.

The Network Consists of:

- **Producers**: Businesses, organizations, or individuals that are able to produce PPE using rapid manufacturing methods
- **Processing & Delivery**: Organizations who can sterilize and deliver PPE to medical providers who cannot do so themselves
- **Health Care Providers**: Health care providers whose staff are in need of PPE
